

While in Louisville the other day, we dropped in at the Ladies' Furnishing establishment of Mr. John H. Cannon, No. 421, Market-street. We venture the assertion, that a more complete and beautiful stock of Bonnets, Ribbons and Millinery goods, cannot be found in Louisville; and the polite manner in which we were treated while in the house, assured us that all connected therewith were gentlemen. Frankfort merchants visiting Louisville would do well to give Mr. Cannon a call.

We are again under obligations to our friend Clarke, of the House telegraph office, for the interesting news from California, which will be found in our paper to-day.

A FAST MAN.—A Mr. Blaxton has made two bets, one for \$4,000, and another for \$500, that he would ride from San Francisco to Independence, Mo., in twelve days. The first three hundred miles of the journey are to be performed with a horse and buggy.

When we were in Lexington last Saturday, we had the mournful pleasure of telling our talented friend Jno. A. Haldeman Esq., good bye. Mr. H. goes to Leavenworth, Kansas Territory to practice the profession of law, and from the reputation he has already achieved, though young, we predict for him a bright and successful future. Mr. H. will devote all of his time to his profession, and he will pay especial attention to the location of land, and the collection of claims in the territory. As a democrat, John never had his superior, and we are anxiously awaiting the arrival of the papers that will chronicle the fact of his having been sent to Congress from his district.

Well John once more farewell. In remembrance of our old friendship and the happy times we have seen together, we drink "a double health" to you.

We had the extreme pleasure of meeting with our good friend W. A. Owens, of the Owen's Hotel in Louisville yesterday evening, and we left him this morning with regret. Will is a fine fellow, socially disposed and (though our conscience forbids us to say it) handsome. What attraction that peculiar attraction draws him to our pleasant little city so often we cannot state with any certainty, though we think we could not miss it very much, if we were to hazard a guess. Never mind, Will we will be down to see tomorrow and there is a great deal we have to tell you.

J. RUSSELL HAWKINS, Esq.—We are authorized to announce J. Russell Hawkins, Esq., as a candidate at the next August election for the office of register of the land-office, made vacant by the death of E. A. McCurdy, Esq.

THE PORTER OF PHRENOLOGICAL DOSES have always been associated in our minds with any and medicine has seemed from the days of childhood, another word for nausea and disgust. Its remedies were the part of sickness, and pain was not so hard to bear as the revolting potions we were compelled to swallow for its relief. Dr. Ayer's Cherry Pectoral is like honey on the tongue and healing balm in the stomach. His Pills! Try them—they are sweet morsels to the taste, and glide sugar-shod over the palate, cut their energy although wrapped up, is there, and strikes with telling force to the very foundations of disease.—Cincinnati Citizen, O.

THE election in Indiana, for State officers (Governor and Lieut. Governor, excepted) came off to-day.

CONVICTED.—The trial of William Ransall, for shooting Capt. Newton Craig, of this city, in July last, during the excitement in regard to Dalia A. Webster, was concluded at Madison, on Friday last. Ransall was sentenced to the penitentiary for the term of three years, and fined one dollar.

JAMES O. HARRISON, Esq., has been selected, by the Directors, President of the Lexington and Frankfort Railroad Company, in place of Wm. A. Dudley, resigned. Mr. Dudley has discharged the duties of the Presidency of the company for several years with credit to himself and advantage to the company. His successor, Mr. Harrison, will, we doubt not, also discharge its duties to the entire satisfaction of those whose interests are confided to his hands and to the community at large.

FAMINE PREDICTED.—The Fort Smith (Ark.) Herald learns from a gentleman who lately visited the Cherokee Nation that it was currently reported there that a child was born in the Nation somewhere, a few days ago, that spoke in a very few minutes after its birth, predicting a famine in three years. This tale is believed by many in that country, as the prospect this season, that, far, goes to prove it to be true for the first year at least, there being little or no corn in the country, it having been cut off by the drought.

THE farm and residence of Wm. A. Leary, Esq., of Fayette county, containing two hundred and forty acres of land, was sold last week to John McMurtry, Esq., of Lexington, for \$40,000, \$166.66 per acre.

The trial of Dr. Graham, for the murder of Col. Loring, in New York, some months since, is now in progress in that city.

Kissane, who was arrested in Cincinnati the other day, by New York policemen, while on his way with the officers to New York, made his escape, and has not since been heard of.

Hon. J. L. Helm, of Hardin county, was on Friday last, elected President of the Louisville and Nashville Railroad.

Rev. Thomas Chilton, a distinguished Baptist Minister, and formerly a member of Congress from this State, died recently in Montgomery, Texas.

HIGH PRICE FOR STANDING CORN.—A gentleman from this State bought a quantity of corn in the field, located in Ross county, Ohio, at \$35 per acre. This, says the Cincinnati Columbian, is doubtless the highest price ever paid for standing corn in southern Ohio.

It is said that an additional volume of Bartlett's History of the United States will be issued about the middle of this month.

The potato crop of Missouri is said to be the largest and best ever raised in the State.

The Washington Star says that when Orin, the vagrant street preacher, impiously called the Angel Gabriel; was arrested, he was searched and a large dirk found upon him.

George C. Thurman, Esq., an eminent lawyer of Washington county, and formerly a member of the Senate of Kentucky, died in Springfield, Mo., on the 30th ult.

The New York Journal of Commerce gives the following satisfactory explanation of what the abolitionist mean by "free speech" and "free discussion."

It is freedom to put forth their denunciations, whenever and wherever they please without interruption objection, and freedom to prevent any one from differing from them, from exercising the freedom of speech. Everybody knows that it takes but a few months, if let loose Beldiam fashion to crown the voice of any speaker, so as to prevent his being understood; and this is the least which the Chicago heroes have performed. The time is not distant when they will be ashamed of it.

Senator Geyer, of Missouri, is said have resigned his seat in the United States Senate. The report needs confirmation.

Correspondence of the Yeoman.

LOUISVILLE, Oct. 6.

DEAR JERRY—I have been for many weeks "in a peck of troubles" lest my non-compliance with my promise might realize in my own case, the old adage, "out of sight out of mind." But no man above the grade of a brute beast is willing to be forgotten by his fellow-men—especially by that portion of them, with whom he has long maintained friendly intercourse. I hope, therefore, that this natural feeling will plead my excuse, for knocking once more at this late hour at your door for admittance. This should have been done much sooner, had it not been that our city, owing to the low water and the exceeding clemency of the weather, has been so dull that I have been unable to find matter for a letter. And the only thing now which can be looked upon as an invasion of this quietest state is the opening of the Mechanics' Institute Fair, which was done on the 25th ult. An eloquent and appropriate address from Col. Preston. He spoke of the ancient philosophy—of Socrates, of Plato, of Aristotle—that if it was to be judged by its fruits they fall short of Democritus, the inventor of the arch—Anachasis the inventor of the potter's wheel. That words and notes but words had been the result of the controversies of the schoolmen for fifty generations. That the proud monument of Grecian greatness was the Column—the Arch, &c., which were considered beneath the attention of the "Philosopher." That this misdirection of the human mind existed in the middle ages—he evidenced the invention of gunpowder and Printing—the manner in which it was received—the inventors unknown. But that now this barren philosophy was dead—that the mind instead of being employed in such controversies was engaged in prohibiting the well being of mankind, &c.

But the center of attraction was the apartment occupied by Durkee, Heath & Co. (dry-goods merchants of our city,) the floor 16½ by 21½ feet, which is covered by rich Bowvaize Carpet, which is considered the wonder in the fair. Rich Brocatell curtains, falling 24 feet from a massive cornice, relieved by lace curtains varying from \$50 to \$100 a pair, from the 4th side of the room. To the right hand, on a table covered with a rich Bowvaize cover, of \$100 value, a mass of Mori Antique Brocade Silks, of the greatest heft and rarest hues, so arranged that all the colors of the rainbow, in bold relief, ran glowing from the table on which they were placed.

To the left, a lady "en puntun" stood arrayed in a dress of the finest and most expensive lace, enveloped in an Opera Cloak of Black Damise Poulde Sor, embroidered with gold, with a fringe which seemed a wreath of pearls.

The ceiling of the room seemed to have been the play-ground of some huge spider which in sporting mood had danced over its surface, bearing behind it most delicious wreaths of lace, &c.

In fact, it is a perfect fairy palace—for like Abou Hassan, I had to pinch myself to see, or rather feel that I was not dreaming while looking at it.

HEMP MACHINE.—HEMP PRESS.—At the Mechanics' Fair we observe two fine models, one machine for hatching hemp, the other a hemp press, invented by Jas. P. Arnold, of our city. This hemp hackle was patented January, 1853, less than two years ago, and so great has been its success, that every hemp manufacturing establishment of any note in the West, either has them in operation or has ordered them.

A TOWN CLOCK.—On exhibition at the Me-

chanics' Institute can be seen a small size town clock, built by J. J. Hirschbuhl. It is an eight day time piece showing two dials whereon is indicated two different times, being now arranged for Louisville and Frankfort time, designating also the days of the month and the week.

It is constructed with a real compensation pendulum which no weather will effect, thereby avoiding inaccuracy in its time. The entire mechanism of the clock is of a novel character and worthy of attention.

The same party has also deposited in the hall a watchman's clock for the use of manufacturing establishments. It has five wires attached, to be constructed to as many different places of the factory where it may be designed to be used. The object of these wires is to apprise the proprietors of any dereliction of duty on the part of his watchman; for should he fail to pull the wires at the proper times designated by the arrangements of the machinery of the clock, the exact hour and place will be indicated by the clock.

"A THING OF BEAUTY IS A JOY FOREVER"—The verity of which will readily be acknowledged by all who will examine the silk quilt, designed and made by Miss Ellingwood, of Shelbyville, composed of 299 diamonds, containing 25 hexagons—combining a total of 7,250 hexagons of various colored silks, surrounded by a blue silk velvet border. The border is embellished with beautiful floral wreaths, embracing two hundred and twenty-five flowers and buds, all of which, with the elegant foliage, are formed of

crucels, picked with the flowers, as specimens and the colors are so exactly matched that the observers are deceived into the belief that they view the natural flowers, foliage and stems, attached by some artificial means to the border.

BEAUTIFUL.—This is the exclamation of every one who examines the beautiful table cover which is exhibited on the right of the door as you enter the Institute. This piece of exquisite needlework is the production of two young ladies, the Misses Ella and Emma Van Antwerp, of Cincinnati, and was executed during their school vacations, and is an evidence of their industry and taste. The table cover was entered by their sister, Mrs. Susan R. Rand, of this city.

LEATHER FRAME.—In the room allotted to the display of musical instruments will be found a very elaborate and artistic "leather frame," composed of a wreath of flowers, interwoven running vines all of the most delicate workmanship. The frame is the work of Mrs. A. E. Bradley, and is deserving of the highest encomiums, as a work of skill and art.

VIAOITE.—This is the name of a new style of ladies' bonnets of Parisian origin. It is so constructed that it can be folded and packed up into a small case of two and a half inches deep, rendering it perfectly portable. The bonnet can be made in every style and turned in the very height of the fashion without impairing its character.

GREENADA.—This is the destination given to a dining and tea set, after the style of Louis XV, which was imported white from Limoges, France, by Locke & Key. The gliding and decoration, were executed in this country.

EVENING AND MORNING.—These are the titles of two beautiful lamp-cases, executed in colored crayons, by Miss Ellingwood, of Shelbyville. They possess great artistic merit, and present the appearance of lightly finished oil paintings.

CARPENTER'S CHESTS.—S. C. Evans has on exhibition, specimen chests for the use of carpenters, the great advantages of which are readily perceived by that class of mechanics.

ARTIFICIAL BOUQUET.—Miss Jennie Kendall, of Lyngrave, has presented to the Institute a very handsome artificial floral display. It is composed of dahlias, lilies, roses, pinks, honey suckles, &c., &c.

FEMALE TELEGRAPHIC OPERATIONS.—A London letter in the National Intelligencer says:

We are glad to find that females are now employed as the principal operatives in the electric telegraph offices. The occasions of the opening and prorogation of Parliament are always field days at the electric telegraph stations, owing to the general desire throughout the country to receive the royal speech with the utmost dispatch. All the officials are on the *qui vive*, picked hands are appointed to work the instruments communicating with the principal stations, and a spirit of friendly rivalry prevails amongst the manipulators as to who shall transmit correctly the greatest number of words within a given time. Upwards of one hundred and fifty clerks are generally engaged in forwarding, receiving, and transcribing her Majesty's address; and on Saturday, for the first time, the services of the female clerks now employed at the Electric Telegraph Company's station were called into requisition. They forwarded the speech with remarkable rapidity, in one or two instances equalling, if not surpassing the speed and correctness of their more experienced male coadjutors. It may not be generally known that the Electric Telegraph Company have established departments for young girls, under a matron, with a view of affording a wider and more intellectual scope for female employment, and the experiment promises to be highly successful. The most rapid result of Saturday's sending was at a rate of thirty-five words per minute. The transmission to the continent (via the Hague) was effected in twenty minutes.

would only call the breakman to most imminent peril on the platforms. Men have talked about self-acting switches, but an engineer who realizes wisely what a climate is ours, with its contractions and expansions by frost and scorching sun, would never move his engine beyond a cat's walking place, up to a switch, the safety of which depended on a spring or a cog. It is said to be bad to be a one-ideal man, but that character is precisely the one valuable and reliable, in the responsible duty of attending the switch. One of our lively Americans would be planning in the interval all manner of improvements in locomotion, and day and night rouse to his routine only when the engine is upon him. The duty is performed but at intervals in the day. Long hours of leisure intervene, but at the minute, morn or night, he must be there. If he be not, desolation and disaster will be.

BY TELEGRAPH.

EXPRESSLY FOR THE KENTUCKY YEOMAN.

Arrival of the Northern Light.

NEW YORK, Oct. 9.

The Steamer Northern Light arrived at New York last evening, with \$616,000, and 494 passengers. She left San Juan on the 1st.

The consignees of the Northern Light are Duncan, Sherman & Co., \$242,000; Wells, Fargo & Co., \$208,000; Drexel & Co., Philadelphia, \$103,000; W. Hage & Co., \$100,000; A. P. Roe & Co., Philadelphia, \$75,000.

The shipments for Sierra Nevada and Panama amounted to \$1,950,000, besides \$700,000 worth of U. S. transfer drafts, on Page, Bacon & Co., which are in the place of specie.

The general election on the 6th, resulted in the success of Deuver and Herbert, anti-Broderick, democrats, to congress.

In the Legislature, as far as heard from, the whigs have elected 7 and the democrats 25 Senators. In the Assembly the whigs have 35 and the democrats 45; but it is doubtful whether the democrats are able to unite upon a candidate for U. S. Senator.

In San Francisco the Know-Nothings carried everything before them. They elected their candidate for Mayor, S. P. Webb, formerly Mayor of Salem, Mass., by over 5,000 on a ticket of 27 names.

The Know-Nothings elected 20 from the nominees of the whig and anti-Broderick convention, and 7 were nominees of the Know-Nothings. They elected every man by some 4,000 majority. The Know-Nothing vote is 4,500 out of 7,000 in the whole city.

The new Common Council is composed of 12 whigs and 4 democrats.

The news from the mines continue favorable. The southern mines especially, are more successful than ever.

Overland emigrants are arriving, but not as numerous as of former years.

Chinese, to the number of 500 to 1,000 arrive at San Francisco every week, the most of which are slaves to their more wealthy countrymen.

The average number of murders and assaults is recorded.

Some British and French ships left San Francisco on a cruise, on the 2d.

The British barque Amelia Thompson stranded North of San Simon Bay.

SAN FRANCISCO MARKET.—There have been for the last two weeks marked improvements on previous rates, and the demand was quite active for all leading staples, especially provisions. Fresh goods are much sought for, but there is no enquiry for old goods.

The banking house of Carothers, Anderson & Co., suspended. It is one of the smallest in the city.

The anniversary of the admission of California into the Union, was celebrated at San Francisco with great pomp, on the 9th.

There have been more Indian massacres among the overland emigrants for Oregon.

SANDWICH ISLANDS, Aug. 7th.—Wa has ceased at the Society Islands, and the revolutionary chief is firmly established on the throne.

FURTHER BY THE CANADA

NEW YORK Oct. 7.

The Canada brings 133 passengers. On the 21st she spoke off Armshad to the steamer Europa, bound for Liverpool.

The Asia arrived out on the 17th.

The instructions issued to the troops at Varna at the moment of their departure had been published, and displayed evidence of the most minute care and forethought, and indicate that their intention is to make an immediate attack on Sebastopol.

A dispatch dated Varna, 22d, says from Russian sources it has been ascertained that the Russians did not oppose the landing of the allies, because their entire force in the Crimea was 34,000 men besides the garrison at Sebastopol. The Russians have 335 men and 48 guns on the heights from St. Crimea to Sebastopol, and will defend their heights to the utmost. The allies march on Sebastopol via Symperopol. The first encounter was anticipated about the 21st or 22d, unless the Russians advanced from their position to meet the allies.

Ships with troops were on the fortress of Kiborn and the island of Fenbria and Odessa, doubtless with the view of intercepting Russian reinforcements.

The English are said to have captured a Russian express steamer with important dispatches from Sebastopol.

VIRGINIA, WEDNESDAY.—The Tremuden Blad states that on the 13th all the strand batteries recently erected at Odessa were destroyed by part of the allied fleet.

A powder magazine had exploded at Pesceop.

There is said to be great loss of life on the part of the Russians. A number of vessels of the allies were also damaged. Sr. PETERSBURG, 14th.—A number of regiments have been inspected by the Emperor, and have left to join in the campaign in the South.

ca CONSTANTINOPLE, 17th.—Whilst the embarkation was proceeding at Varna an

English vessel upset two gun-boats, and twenty lives were lost.

ATHENS 16th.—The French commander has demanded that 14,000 troops should be received at Athens. The King refused, and declared that he would leave his capital.

The cholera is abating at Madrid.

The English officers have been sent to Kars.

Prince Napoleon has sent 125 muskets to Schamyl.

Persia is threatened by the Turkamons, who have taken the fortress of Moro and Meschid.

The Grand Duke Constantine was expected at Sympereopol.

The cholera was abating in London.

The Emperor of the French, it is rumored, is to visit England.

A most diabolical outrage has been perpetrated in Ireland. About 900 inhabitants of Enniskillen and neighborhood, including the Earl of Enniskillen, proceeded to Derry on the 15th, by railroad, and had a grand Protestant and Orange celebration. As they were returning the train came in contact with a large fragment of rock, placed upon the rails, near an embankment, throwing the train off the rails, instantly killing the stoker and wounding numerous others, including the Earl. It is stated to have been a deeply laid Polish conspiracy, and suspicion of it was entertained before, so unusual precautions were taken, and the train was going at a very slow rate, otherwise the loss of life would have been frightful.

DANTZIG, TUESDAY.—We are in receipt of dispatches. All the Admirals met on board the Duke of Wellington. Swabog and Constadt are not to be attacked this season.

The French Admirals and fleet sailed for France on Monday.

The Austriaz got on Schamyl rocks; she threw off 21 guns and got off again.

MADRID, 17th.—If the electoral committees of Madrid have adopted the programme of the Liberals.

BALTIMORE, Oct. 7.

New Orleans papers of Saturday are received.

A severe froshet had occurred in several of the interior counties of Mississippi. Bridges and buildings were carried away and the roads were impassable for several days. Cattle were drowned and great damage was done to crops.—The rain fell without intermission for six days.

Deaths at the Charity Hospital for three days previous to Saturday 122. The epidemic is on the increase.

SAVANNAH, Oct. 4.

There were 6 deaths from yellow fever here to-day. Intermittents for the week 65, of which 27 died of fever.

There were 6 deaths from yellow fever at Charleston to-day.

NEW YORK, Oct. 7.

A motion was made by the district attorney to-day for a new jury in the case of Dr. Graham, in consequence of a cousin of Mrs. Graham's being on the jury.—The court refused unless supported by an affidavit.

CINCINNATI, Oct. 3.

There was a great deal of excitement in Covington to-day, in consequence of a German having killed a small boy for calling him a Dutchman. Threats were made to force the jail and administer summary punishment.

NEW ORLEANS, Oct. 2.

Deaths for the week 420, by fever 269. This is a large decrease.

NEW YORK, Oct. 7, M.

There are no signs of the Arctic yet.

WASHINGTON, Oct. 4.

Minister Marling accompanies Mr. Wheeler in the Princeton.

Mr. Leconte, of Maryland, the new Chief Justice of Kansas, carries out two or three old family slaves.

Col Phillips of Alabama, considered by many the ablest Democratic member of the House, is spoken of for Secretary of the Navy, should Dobbin go into the Senate.

BOSTON, Oct. 4.

At the recent term of the supreme court in Woodstock county, James Matthews was convicted of the murder of Samuel James, whom he killed in April last. They were both lumber men. Mathew shot James for turning a girl out of his camp.

A rain storm commenced here last night, and still continues.

The seven persons who were arrested in Atlanta some weeks since, for counterfeiting bank bills, &c., are to be tried on the 13th inst. Among them are True C. Young, who has been under arrest in Boston for counterfeiting, a man named Bonny, also a man of 60 years of age named Heard, quite wealthy, whose daughters signed the bills. The names of the others are Bowers, Gleason, Wilson, and Dunn.

SPECIAL NOTICES.

The Germans have produced some very excellent remedies for various diseases. Among which may be specified "Dr. Hofflands celebrated Bitters," for sale by C. M. Jackson—and used with remarkable success in Liver Complaint, Jaundice, Dyspepsia, Nervous Debility, and a general derangement of the stomach. The Sunday Dispatch says of this medicine:—

"We feel convinced, that in the use of the German Bitters the patient does not become debilitated, but constantly gains strength and vigor to the frame—a fact worthy of great consideration. The Bitters are pleasant in taste and in smell, and can be administered under any circumstances, to the most delicate stomach. Indeed they can be used by all persons with the most perfect safety. It would be well for those who are much affected in the nervous system, to commence with one teaspoonful or less, and gradually increase. We speak from experience, and are, of course, a proper judge. The press far and wide, have united in commending the German Bitters, and to the afflicted we most cordially advise their use."

FOUND.

In the streets of Frankfort, on Saturday, a pair of Spectacles, which the owner can get by describing them and paying for the advertisement. Oct 10.

REWARD.

I WILL pay ten dollars reward to any person who will arrest one Alexander Byrnes, (who is a fugitive from justice having escaped from me after being arrested) and deliver him up to my hands or to S. Sanders, J. P. at Monterey, Owen county, Ky., within sixty days from date hereof. This 4th day of October, 1854.

DESCRIPTION.
Said Byrnes is about fifty years of age, gray-headed with light eyes, quick spoken and active for one of his age.

W. H. KEENE

WHOLESALE AND RETAIL, DEALER
In Groceries, Liquors and Provisions.

At the house recently occupied by
BROWN AND SAYRES.

THE undersigned having made his stock complete, solicits the patronage of the former patrons of the house and all other friends. He pledges himself to try and make it that interest to patronize him. His stock consists in part of:

New Orleans Sugar, Powdered, Crushed, and Loaf Sugar; Plantation Molasses; Sugar House Molasses; St. Louis Syrup, &c. &c.; Gun Powder; Imperial and Black Tea; Rio and Java Coffee; Soap; Mould and Star Candles; Lard Oil; Butter and Water Crackers; Nails Assorted; Rice; Mackerel in barrels and half barrels; Flour, Starch, Table Salt, Tubs, Buckets, Baskets, Malt Liquors; Wood Saws, Dippers, Vinegar, Spices or every description, and articles too numerous to mention.
W. H. KEENE.
